

HELLO NEIGHBORS!

Nancy and I have decided to continue the discussion of the high number of trash haulers in our alley between Hamline and Albert.

We would like to acknowledge and thank Rebecca on Wellesley Ave. for the initiation of this charge, weeks ago, when she sent out a letter to all of us.

Lets do this...lets make a change in our alley.

- Our biggest objective is...lets reduce the number of trash trucks. Subsequently reduce the noise and emissions in the air.
- Our second objective in cost...research is showing that local haulers, highland and berquist have the best rates.

I'm glad to report that I'll be saving 20 dollars per month by switching from Veolia to Highland Sanitation. Please note that Veolia reimbursed me, some may not. Please call to see. They may suggest matching monthly costs, however that doesn't meet our highest objectives...noise and emissions.

Currently we have four homes using Highland. No one appears to be using Berquist, so we suggest we all look at Highland. By doing so the high number of homes may reduce our prices (see attached price lists)

If choosing Highland ask for the Anne Scheller block rate quote. This is not a mandatory request, however there have been several alleys in St. Paul that have done this and have been successful. Lets think of this as one little thing we can do to make a big difference.

Thank you for reading this and considering this thoughtful and worthy suggestion.

Anne Scheller (1357 Berkeley Ave.)

Nancy Andrews (249 Hamline ave.)
